TUTORIAL On How To Use Process Explorer

You can make the Process Explorer window partially transparent so that windows beneath it show through on systems that support it by making a selection under the View|Opacity menu item. Saving When you choose File|Save Process Explorer saves the contents of the Process and lower pane, if it is showing, as a tab?delimited text file.

Process Explorer guide for newbies

This is a guide written for people who have a basic knowledge of windows and want to know a bit more about what Process Explorer is telling them. It tries to avoid going into technical detail. It has been updated since the original posting to include details about the testlimits utility and some links that people have suggested.

How to use Process Explorer like a Pro

If the Windows Task Manager is a burger and fries from White Castle then Process Explorer is a savory slab of prime rib from Peter Luger's steak house. If the Windows Task Manager is ... wait a second... hold up – you get the point right? In this guide I'm going to show you how to drive your processes like a Nissan GTR.
