Sentaurus TCAD

vendors, Sentaurus Process provides a predictive framework to simulate a broad spectrum of technologies, ranging from nanoscale CMOS to high-voltage power devices. With Sentaurus Process, users can easily simulate process modules and integrate them into complete front end of line (FEoL) process flows. An advanced set of oxidation, diffusion,

Sentaurus Process

Sentaurus Process is part of a comprehensive suite of core TCAD products for multi-dimensional process, device, and system simulations, embedded into a powerful user interface.

Sentaurus Process User Guide, performance investigation using TCAD . Sentaurus Tcad User Guide
synopsys_TCAD_user this is group is for the people who are using Synopsys TCAD tool for process/device
simulation. Silvaco, ATLAS Users Manual, Device Simulation Software, Silvaco, September, 2004. [6]

Sentaurus Workbench

Sentaurus Workbench projects. A project consists of a family of scenarios. Each scenario consists of a family of
experiments where certain sensible input variables take different values. Parameters can be introduced at any
point in the simulation flow, from the process to the device simulation phases.
