Honda EU7000iS Review | Quiet 7000 Watt Inverter Generator

The Honda EU7000iS is a fantastic 7000 watt inverter generator that won't disappoint you. Definitely, one of the best 7000 watt generators money can buy and far superior to conventional generators of the same size because it's quiet (52 to 60 dB) and produces clean energy that can safely power sensitive electronic devices.

Conventional Generators vs Inverter Generators | The ...

Inverter generators are a relatively recent development, made possible by advanced electronic circuitry and high-tech magnets. These are generally 3-phase generators that output AC current like most traditional generators, but that current is then converted to DC, and then "inverted" back to clean AC power that maintains a single phase, pure sine wave at the required voltage and frequency.

Honda EG2800i generator

The Honda EG2800i is part of the Generator test program at Consumer Reports. In our lab tests, Generator models like the EG2800i are rated on multiple criteria, such as those listed below.

Generator Ground

Got this off the Champion website FAQ “What is “floating neutral” and how does it affect my generator?”
“Most Champion Power Equipment generators have a “floating neutral”, meaning that the neutral circuit is not connected to the frame or to earth ground.
